Art Unit: 1712

1. Applicants' request for continued examination filed 10/28/04 has been entered. The notice of abandonment, mailed 10/29/04, should be disregarded. The Examiner notes that the independent claims have been amended to include the phrase "consisting essentially of" rather than "comprising". This appears to be the only amendment made to the pending claims.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1 to 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Takita et al.

4. Claims 1 to 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over JP 50-97644 (herein '644) in view of Matsushita.

5. These rejections rely on the rationale of record. The prosecution history, particularly the Examiner's Answer to Applicants' Appeal Brief dated 6/5/02, provides a detailed explanation of this rejection rationale. The Board of Appeals decision dated 8/31/04 confirmed the validity of these rejections. See page 5 of the decision. Applicants have amended the claims to include the language "consisting essentially of". This fails to overcome the obviousness of the claims.

As is well established, the phrase "consisting essentially of" limits the scope of a claim to the specified materials or steps "and those that do not materially affect the basic and novel characteristic(s)" of the claimed invention. MPEP 2111.03 addresses this phrase and applicants' responsibilities. As noted in the MPEP, if an applicant contends that additional steps or materials in the prior art are excluded by the recitation of "consisting essentially of," applicant has the burden of showing that the introduction of

Art Unit: 1712

additional steps or components would materially change the characteristics of their invention.

In the instant application, applicants have not met this burden. In fact, applicants did not even argue, let alone meet their burden of showing, that this phrase overcomes the obviousness of the claims. The response does not even mention the prior art rejections. Since applicants have provided no arguments to rebut the rejections of record these rejections are maintained.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Margaret G. Moore whose telephone number is 571-272-1090. The examiner can normally be reached on Monday to Wednesday and Friday, 10am to 4pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Randy Gulakowski can be reached on (571) 272-1302. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system.
